

# USER MANUAL

## Huntkey Power Strip

Thank you for choosing Huntkey products. Before using this product, please read this manual carefully for correct and safe usage.

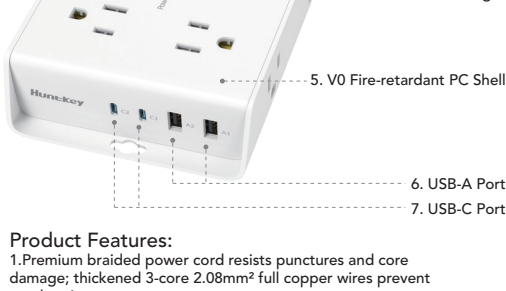

### Specifications

Model	SMG807C
AC Input	Max.125Vac 60Hz 15A
AC Output	125V/15A Max. 1650W
USB Output (2C+2A)	5V/3.1A (Total Max. 15.5W)
Power Cord	1.2m/4ft, 3*2.08mm <sup>2</sup>
AC Outlets	8
Surge Protection	1080J
Overload Protection	YES
Material	PC, Copper
Product Dimensions	143*93*39.5mm

### Usage Instructions

1. When in use, ensure plugs are fully inserted into the outlets. Avoid gaps between plug and outlet to prevent foreign objects from causing short circuits.
2. Maximum USB charging output is 15.5W. It can charge tablets and phones simultaneously. Before use, confirm the power consumption of your charging devices to avoid overloading and product failure.
3. Avoid placing this product near flammable materials during use.
4. Regularly inspect household extension cords, switches, and outlets. If abnormalities like damage or overheating occur, stop use immediately and replace.
5. This product is designed for North America voltage (AC 125V) ONLY. Do not use with other voltages.

### Overview

#### Product Features:

- 1.Premium braided power cord resists punctures and core damage; thickened 3-core 2.08mm<sup>2</sup> full copper wires prevent overheating.
2. 8 widely-spaced full copper integrated outlets prevent interference and minimize temperature rise.
- 3.1080J surge protection rating withstands voltage fluctuations and large current spikes.
- 4.Red power indicator light is visible during the day, non-dazzling at night, and won't disturb sleep.
- 5.PC shell with UL94 V-0 fire-retardant rating ensures safety even under high-temperature burning.
- 6.Dual A-ports allow simultaneous charging without waiting.
- 7.Dual C-ports for fast charging, saving time.

### Important Safety Instructions

- Do NOT connect this product to an ungrounded power outlet.
- Do NOT power this unit using another extension cord.
- Do NOT exceed the electrical ratings.
- For indoor dry location use ONLY.
- Do NOT use this product if the plug is damaged.
- To disconnect power, unplug the AC power plug.
- Do NOT plug this product into another power strip.
- Do NOT cover this product during use.
- For cleaning, use ONLY a dry cloth or brush.
- Install this product away from heat sources like radiators.
- Keep children away from this product.
- Do NOT place this product near open flames (e.g., candles).
- If this product malfunctions or parts are damaged, do NOT attempt repair by maintenance personnel (it can be discarded directly).
- End-use equipment should have a fire-retardant enclosure with a minimum rating of UL94 V-0.
- Possessing surge (lightning protection) functionality does NOT mean it can be used as a lightning rod.
- Do NOT exceed the maximum outlet power rating of 1650W.
- Maximum USB charging output is 15.5W. Confirm device power consumption before use to avoid overload and product failure.
- During use, ensure plugs are tightly inserted into outlets to prevent poor contact and hazards.

### WARNINGS:

- During prolonged charging, the product's base surface may become hot. Do NOT touch the base surface for more than 1 second.
- Ensure proper grounding during use. High Voltage Hazard - DO NOT touch.
- Risk of Electric Shock - Avoid use in damp environments.
- Do NOT subject this product to strong impacts. Unauthorized disassembly or modification of the power cord is prohibited.
- Keep away from fire sources and avoid direct sunlight to prevent damage to electrical wiring.
- Children must be supervised by an adult when using.
- Do NOT use a damaged power cord.

#### CONTACT INFORMATION

If you encounter any issues during use, please feel free to contact us!
